

Game 4: In the Zone

Game 4: In the Zone

The goal of this task is to develop better distance-control on long putts. This is a vital skill in reducing the frequency of 3-putts. On average Tour professionals only 3- putt once every 36 holes. Aim to become better than this.

Rules of the Game

All 18 putts are played between 20ft to 60ft. Select 18 different putt stations at random distances (between 20-60ft) and at different locations. Place a line (boundary) of 2 clubs 4ft directly behind the hole. If not place tees/markers to define a zone area.

For a putt to be successful the ball must finish either in the hole or between the hole and the boundary located 4ft behind the hole. The ball is not allowed to touch the boundary or go past. The objective is to record how many putts in a row you get into the zone.
